Marine Services

AT THE SEA

WE ARE THE PROS

<https://seafox-eg.com>

About SEAFOX

Seafox Diving and Marine Services Company was established in Alexandria in [2019], and is a leading company in the field of diving and marine services. We are committed to providing comprehensive and innovative solutions in the field of marine services, with a commitment to quality and the finest details. We have a long experience in this field, as our team has implemented various and successful projects in various sectors, and we always strive to achieve the highest levels of quality in every aspect of our projects, from design to implementation.

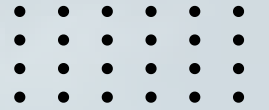

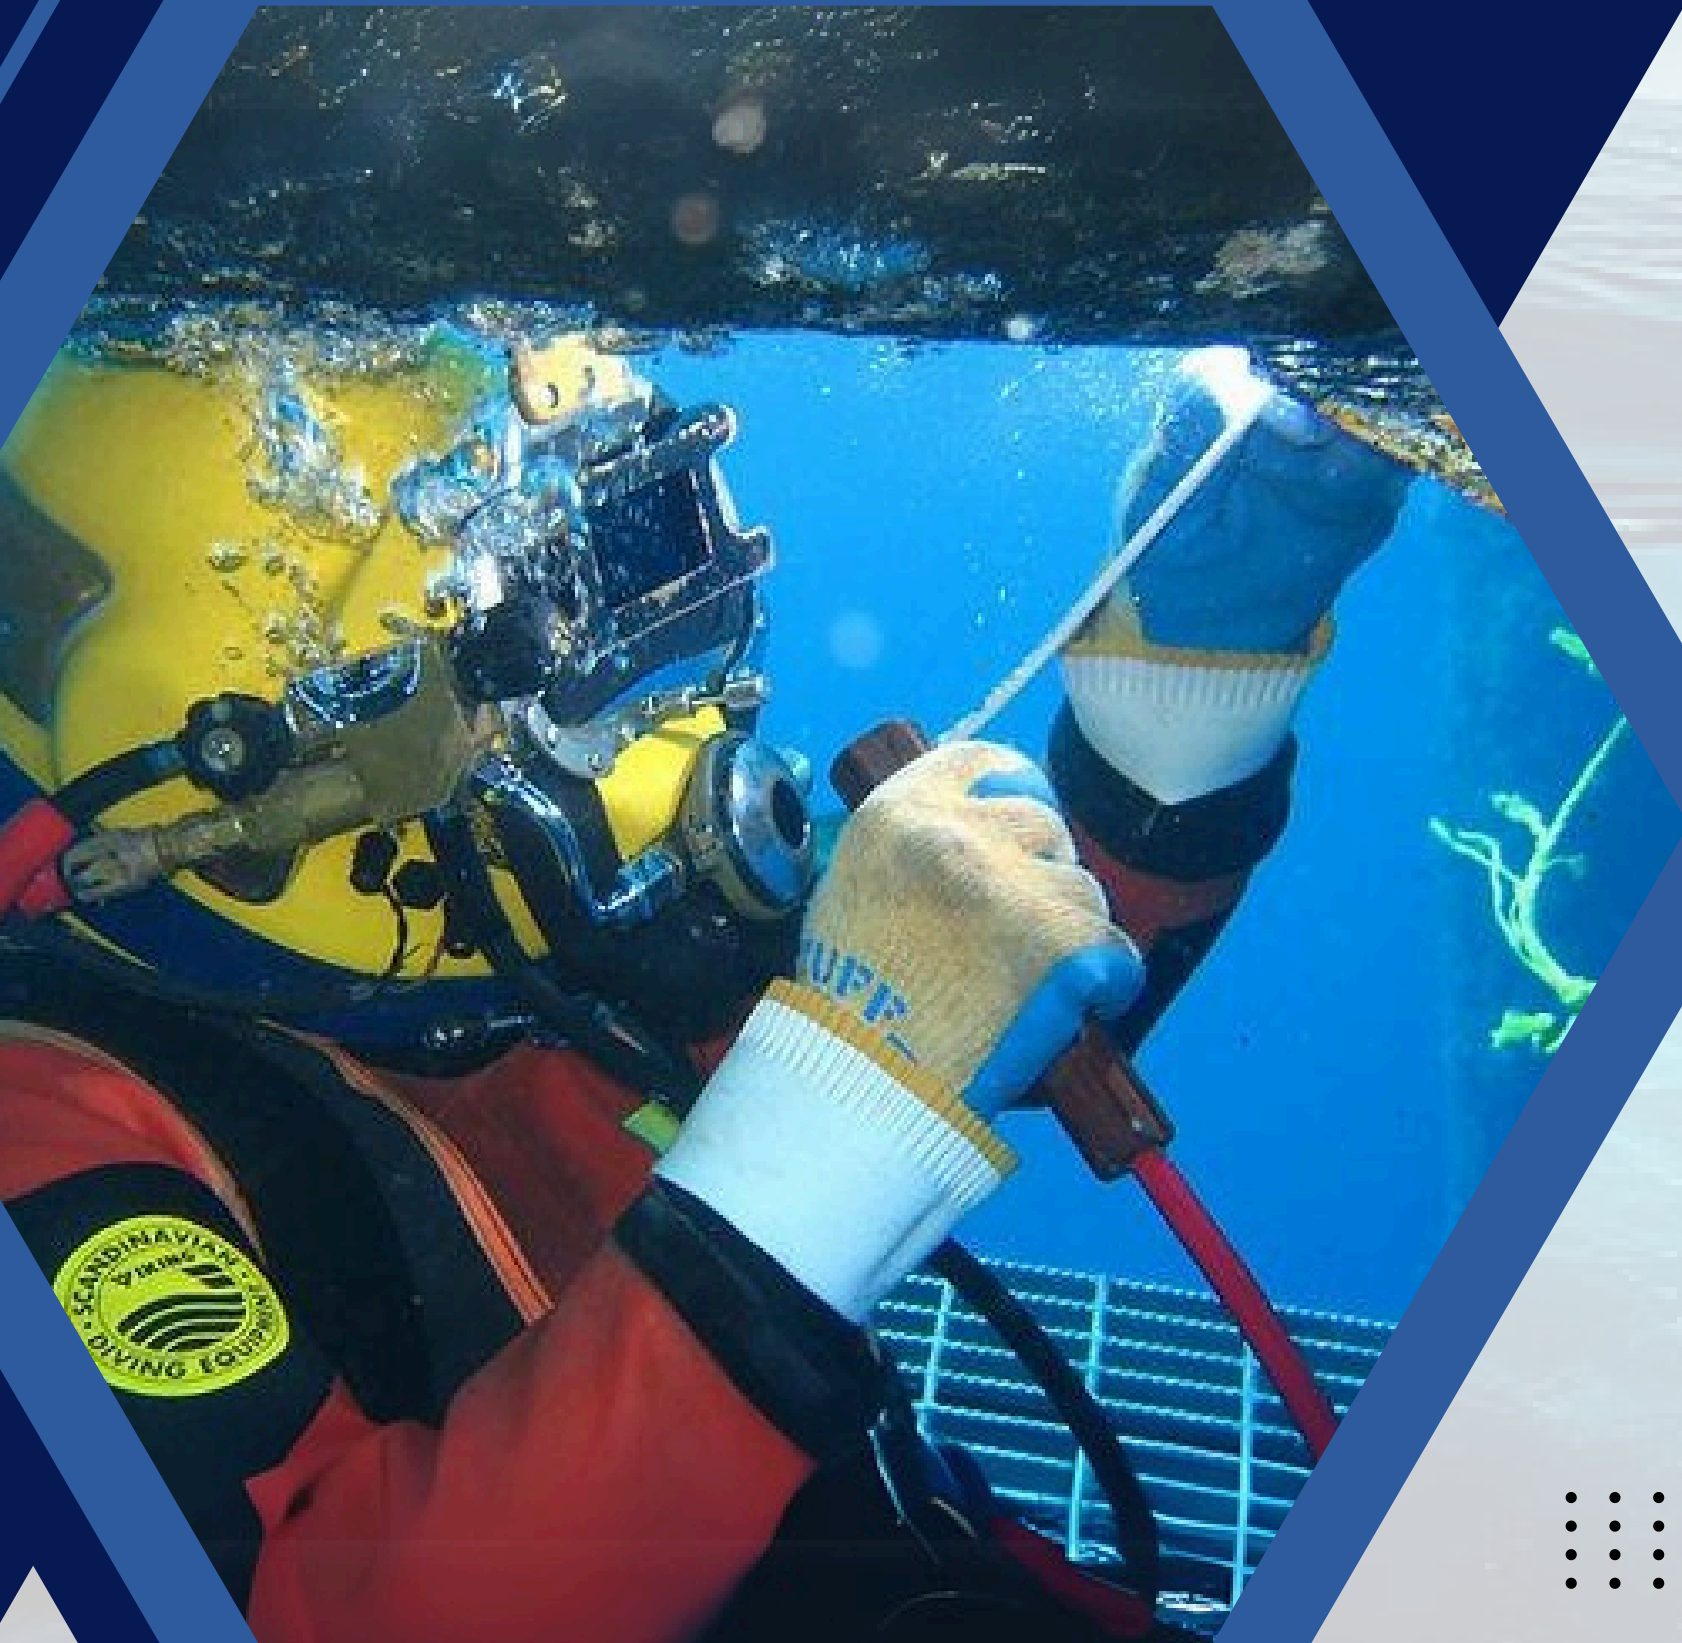

Seafox has evolved into a specialized company that today provides a wide range of integrated services. Including diving services, marine surveying and marine services.

We also rely on the latest technologies and innovations in the field of marine services, which contributes to achieving efficiency and providing innovative projects.

Our team consists of highly experienced and qualified engineers and experts. Which enables us to face challenges with confidence, and we are committed to delivering our projects on time, without compromising on the quality of work, and our team always strives to achieve an ideal balance between creativity and reliability.

Quality Assurance SEAFOX complies to all profession international standards, through acquiring the required professional certification and implementing the QHSE instruments such as ISO 9001: 2019 based Quality Management System & ISO 18001:2007 OHSAS (Occupational Health & Safety) and ISO 14001:2015.

- **Our Mission...**

To be the first choice in our sector and to provide our clients with professional, fast, and affordable service solutions.

- **Our Vision...**

To rank among the top marine service providers in the Middle East for both oil and gas and civil Engineering projects.

- **Our Values...**

Our values are the compass guiding us. We champion excellence, integrity, sustainability, innovation, safety, and collaboration.

OUR SERVICES..

● DIVING

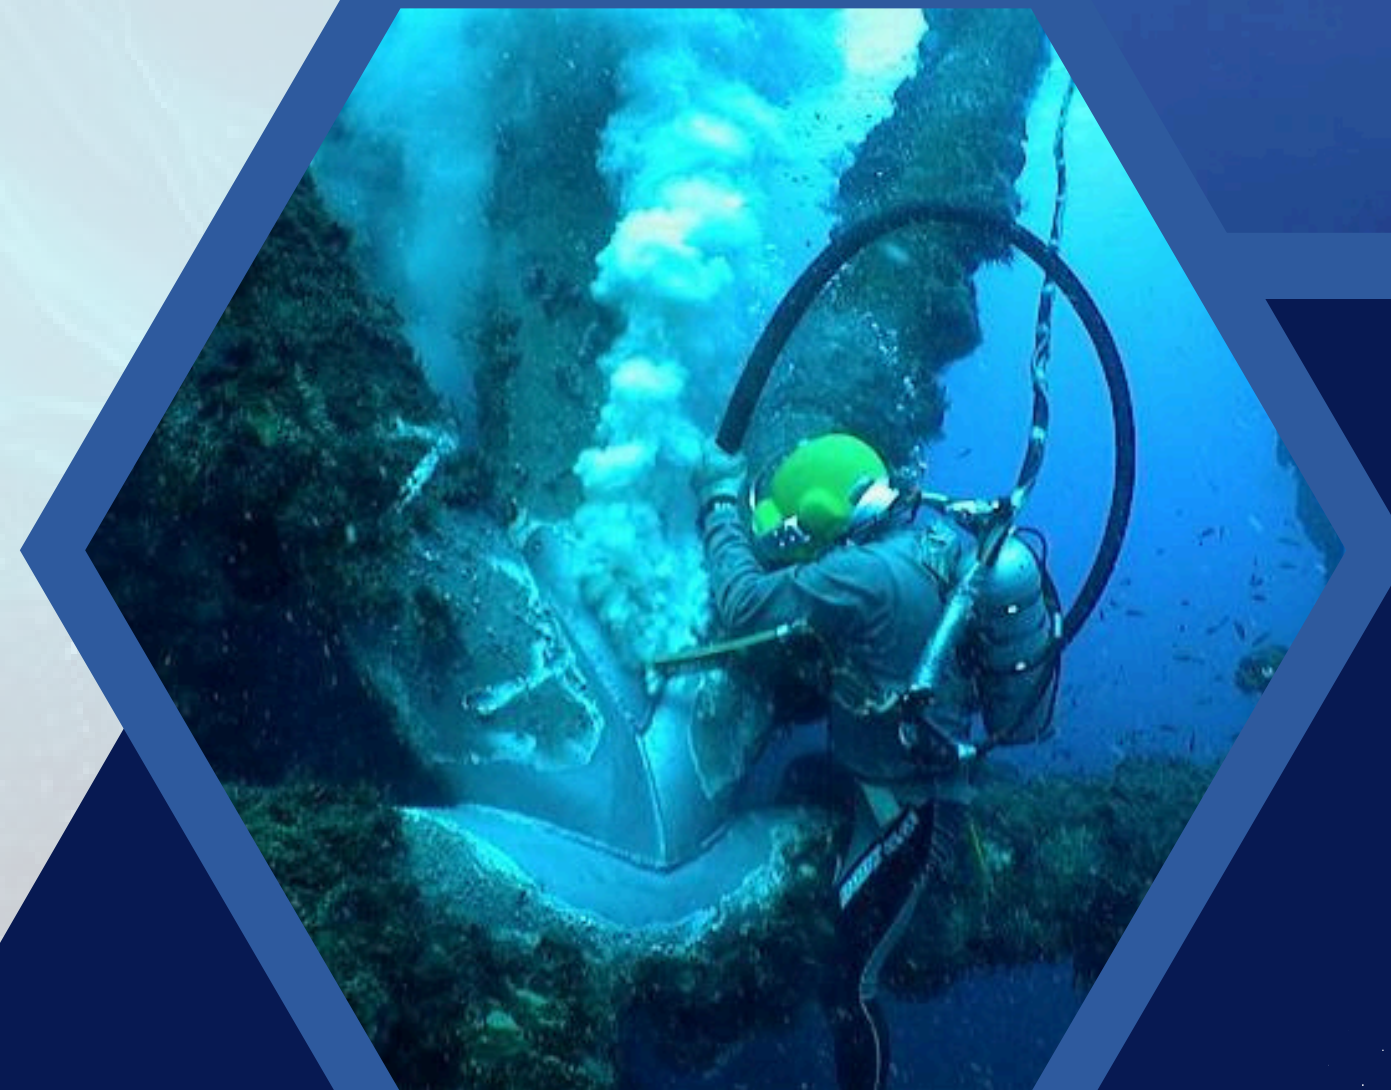

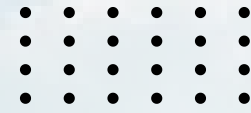

1. Oil & Gas

UWILD Survey and Rigs

- UWILD survey
- Video Survey
- Still photo survey for the rigs
- Wall thickness measurement
- Testing of cathodic protection
- Underwater general visual inspection
- Underwater inspection lieu of dry dock for rigs
- Underwater inspection for spud can steel plating
- Cleaning and testing of welds using sandblasting SA 2.5
- Reports services

Underwater Inspection and Repair for Offshore Platforms

- Seabed survey
- Repair of platform
- Replacement of risers
- Installation and testing of scarification anodes
- Installation of anode slides
- Repair of platform boat landing and fenders
- Cleaning structure for subsea marine growth
- Splash zone coating
- Scour survey
- NDT test
- Measurements of platform member thickness
- Cracks inspection at platform nodes or connections using MPI

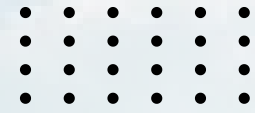

OUR SERVICES..

● DIVING

Operating for Offshore Terminals and Maintenance

Our team is adept at handling tasks related to offshore terminals. We provide support for maintenance activities, ensuring smooth operation and safety at the terminal. Our services include:

- Operation assistance
- Routine inspection and maintenance for the terminal

Supply and Installation of Navigational Aids and Buoys

- SPM refurbishment
- Dismantling for SPM chains, dismantling of submarine hose from lower to upper flanges
- Securing and towing SPM buoy hull to the workshop location
- Repair of leakage of PLEM elbow by underwater welding including MPI & hydrostatic test
- SPM Inspection
- Inspection, maintenance, and repair for SPMs
- Measuring of chain thickness and angle
- Inspection and testing of cathodic protection
- Measuring buoy hull thickness
- General visual inspection
- SPM operation
- UW inspection for SPM PLEM valves and floating hose before tanker arrival
- Assistance during tanker arrival and departure
- UW inspection of SPM after tanker departure
- Routine inspection of SPM parts
- SPM Maintenance
- Replacement of submarine hose
- Replacement of PLEM valves
- Replacement of floating hose
- Replacement of anchoring chains
- Adjusting of configuration of submarine hose either Lazy S or Chinese Lantern
- Maintenance and replacement of SPM parts according to maintenance plan

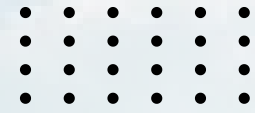

OUR SERVICES..

• DIVING

Subsea Pipeline

We specialize in all aspects of subsea pipeline solutions:

- **Supply and Installation:** Our team provides a turnkey solution for subsea pipelines, handling procurement, transportation, and safe installation.
- **Maintenance:** We offer ongoing maintenance services to ensure the integrity and functionality of your subsea pipelines.
- **Repair of submarine pipelines**
- **Installation of pipeline clamps**
- **Reinstallation of pipelines anchoring and stabilization blocks**
- **Inspection of subsea pipeline**
- **Crude, ballast, water intakes, effluent lines general, close, and detailed visual inspection**
- **Marine growth removal**
- **Free spans correction, C.P & MPI measurements**
- **Pipeline mapping**

OUR SERVICES..

- **DIVING**

- **Ports and Jetties**

Our divers provide comprehensive Inspection, Maintenance, and Repair (IMR) services for ports and jetties, including:

- Bathymetric and geophysical survey
- Navigation aids supply, maintenance, and repair
- Diving support for jetty construction
- Wreck removal
- UXO Surveys
- Metocean data collection
- UW Inspection, maintenance, and repair
- Geotechnical investigation

- **Desalination and Power Plants**

Our underwater expertise extends to desalination and power plants:

- **Intake and Discharge Pipelines:** We handle the underwater aspects of intake and discharge pipelines for desalination plants, including supply, installation, and maintenance.
- **Pre-Investigations:** Our divers conduct thorough pre-investigations through soil sampling and seabed video surveys, providing vital data for informed decision-making.
- Installation of intake and discharge pipelines
- Installation of offshore intake
- Geotechnical investigation
- Bathymetric and side scan for pipeline route
- Installation of concrete blocks
- Construction for breakwater

OUR SERVICES..

- **Spare parts and maintenance**

The company supplies all spare parts and equipment for commercial diving, maintains commercial diving equipment, tests and issues approved certificates for commercial diving equipment, and rents commercial diving equipment.

- **Maintaining equipment and issuing certificates**
- **Supplying spare parts and diving equipment**
- **Equipment rental**

- **Marine piles**

Pioneering excellence in maritime operations with comprehensive and tailored solutions for optimal efficiency and safety

We supply and hammer metal pipes of all lengths and diameters to construct marine piers, water station warehouses and bridges.

OUR SERVICES..

● SURVEY

● SEAFOX Survey Services

Our Survey Services department offers a wide range of expertise in the following areas:

● Geophysical Surveys

Our geophysical surveys are designed to explore and analyze subsurface conditions, offering critical insights for construction, oil and gas exploration, and other applications.

● Unexploded Ordnance (UXO) Survey

We conduct thorough UXO surveys to detect and safely manage unexploded ordnance, ensuring the safety and security of marine and construction operations.

● Positioning Services

We provide precise positioning services that are crucial for offshore operations, ensuring accurate location data for drilling rigs, vessels, and other marine assets.

● Geographic Information Systems (GIS) Solutions

We offer comprehensive GIS solutions, enabling clients to visualize, analyze, and interpret spatial data for improved decision-making and project management.

● Construction & Dredging Survey Support

SEAFOX supports construction and dredging projects with precise survey data, ensuring that operations are carried out accurately and effectively.

● Marine Environmental Services

Our environmental services include monitoring and assessing marine ecosystems to support sustainable development and compliance with environmental regulations.

● Meteorological & Oceanographic Data Collection

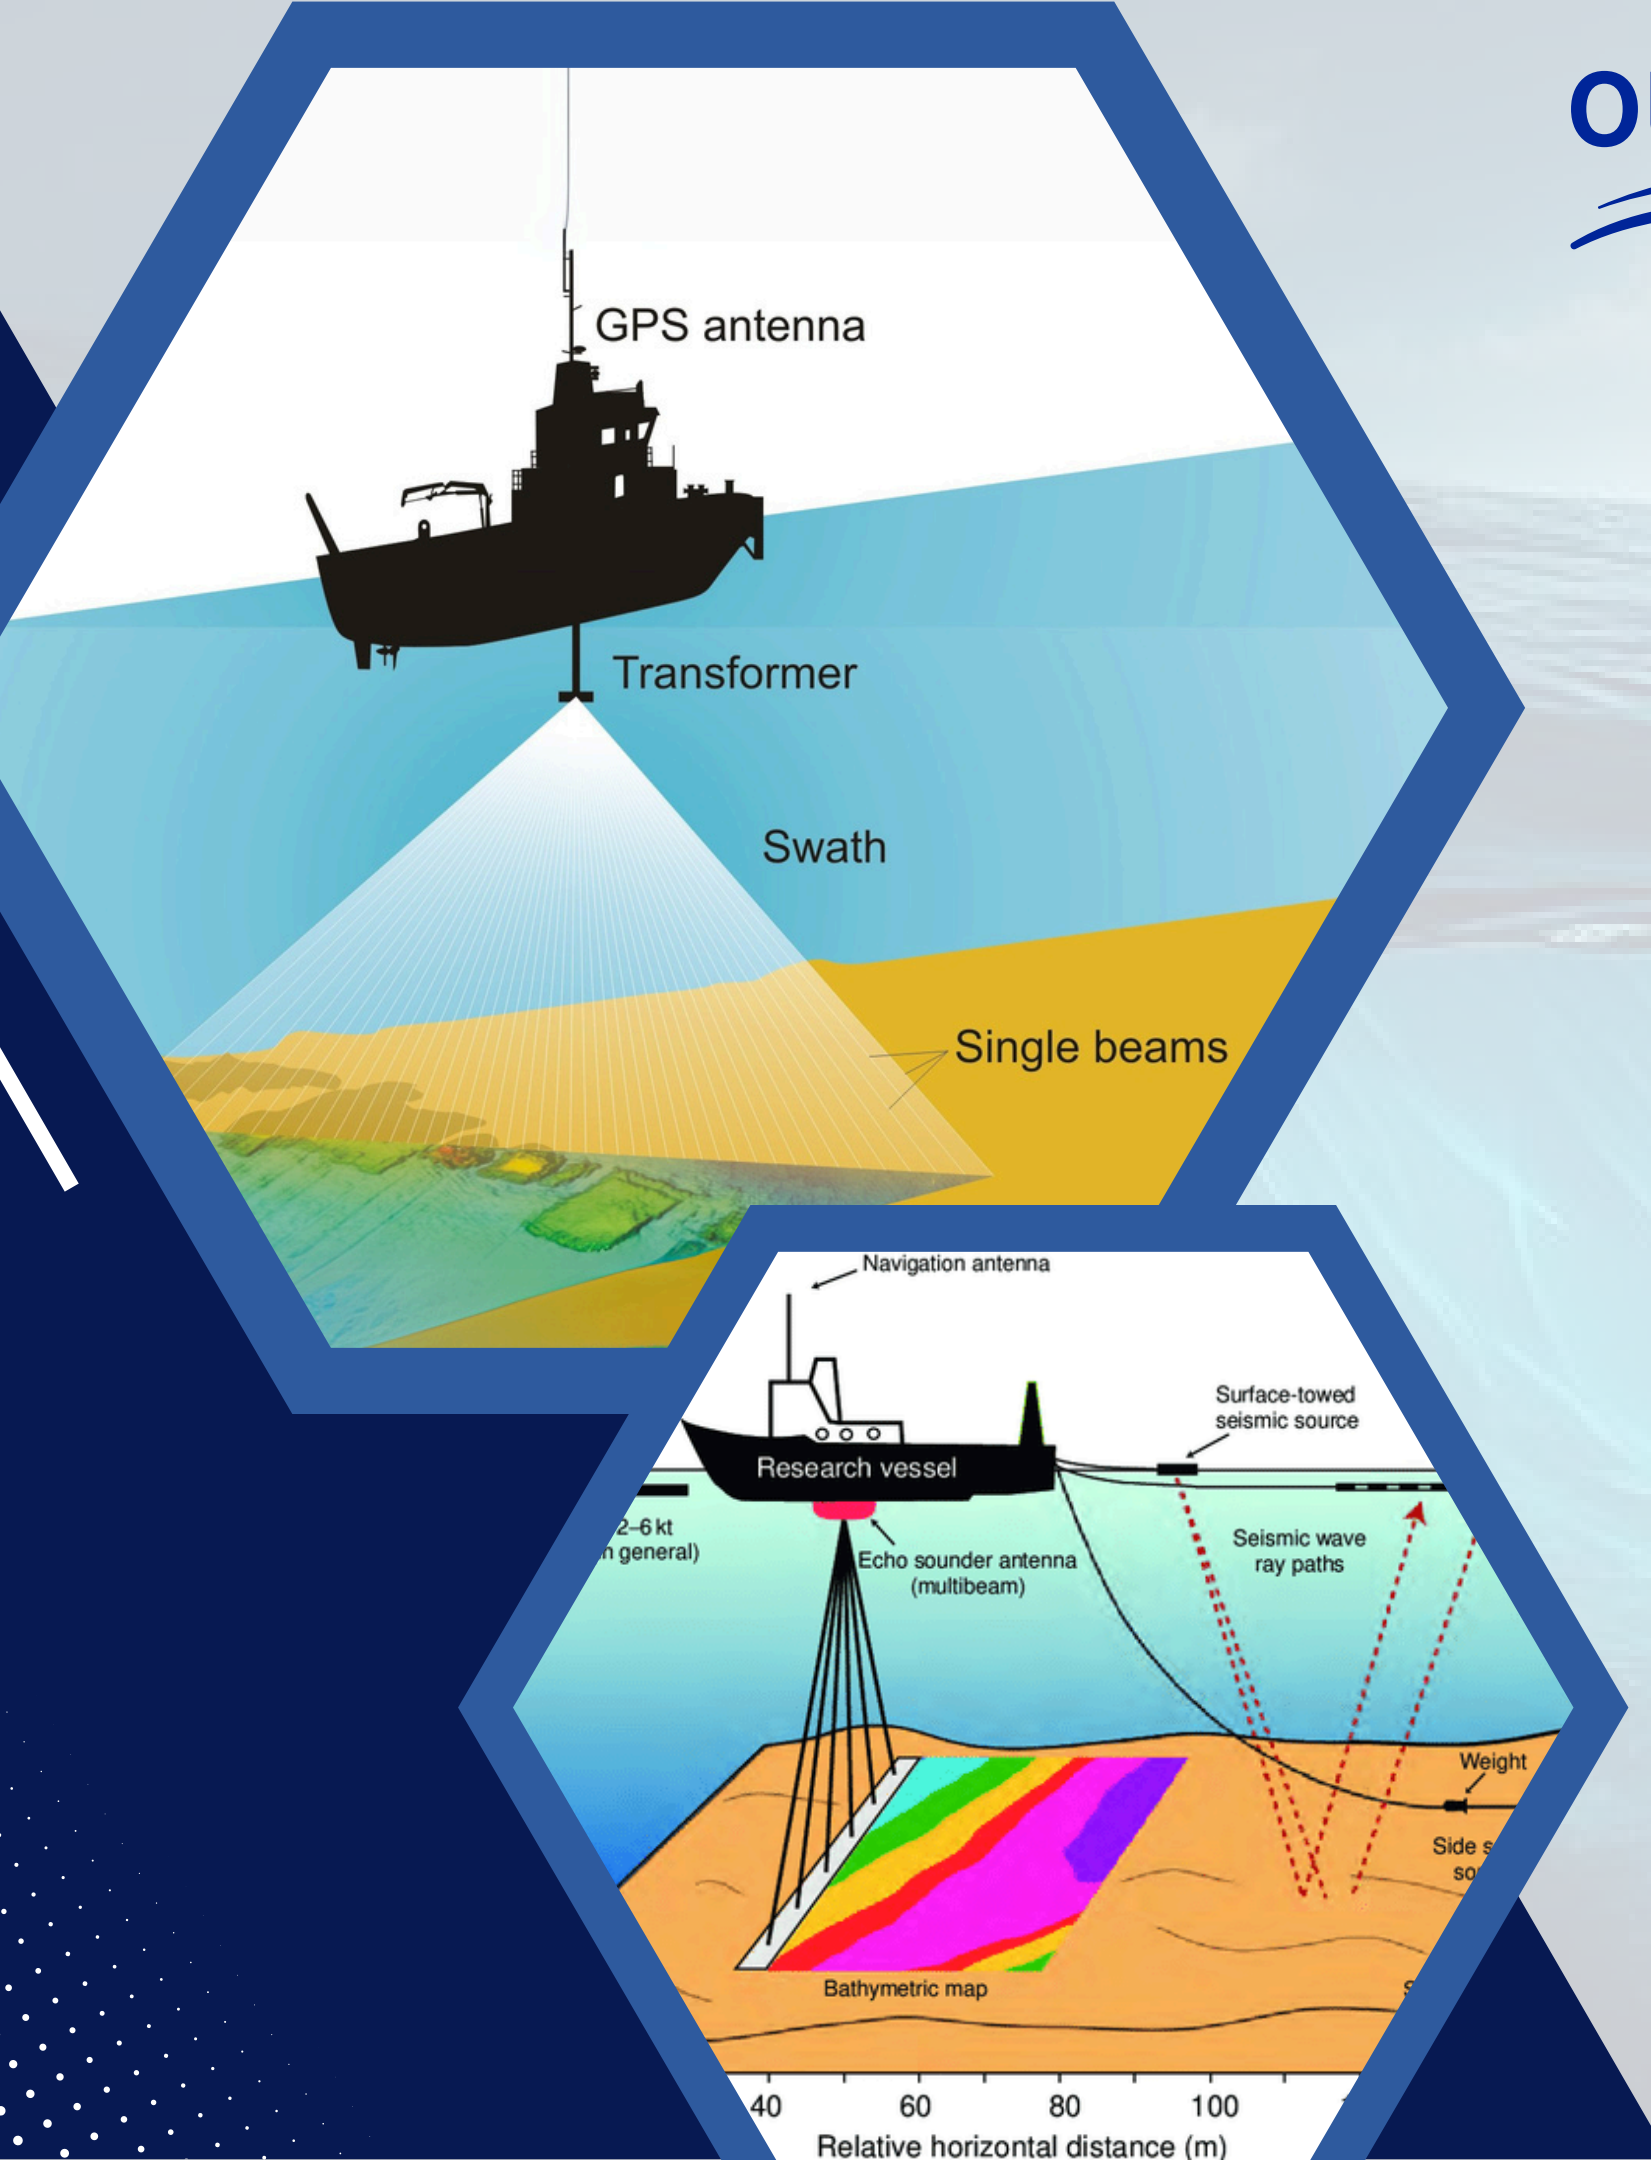

We collect critical meteorological and oceanographic data, providing valuable information for weather forecasting, climate studies, and marine operations.

● Survey Equipment and Solutions

SEAFOX offers a wide range of survey equipment for sale, rental, and repair. Our inventory includes state-of-the-art tools and technologies to support diverse survey needs.

● Archeological Survey

Our specialized archaeological survey services can meticulously assess your underwater site, pinpointing potential shipwrecks, lost harbors, and submerged settlements. This information empowers you to make informed decisions for exploration, preservation, or cultural heritage projects.

OUR SERVICES..

● ROV

● Platform Inspection

Assessing the condition of offshore platforms.

● Pipeline and Cable Inspection

Examining subsea infrastructure for damage or anomalies.

● Free Span Detection

Identifying potential hazards caused by erosion and unsupported sections.

● Pipeline and Cable Monitoring

Continuously tracking the health of pipelines and cables during installation.

● Drilling Rig Support

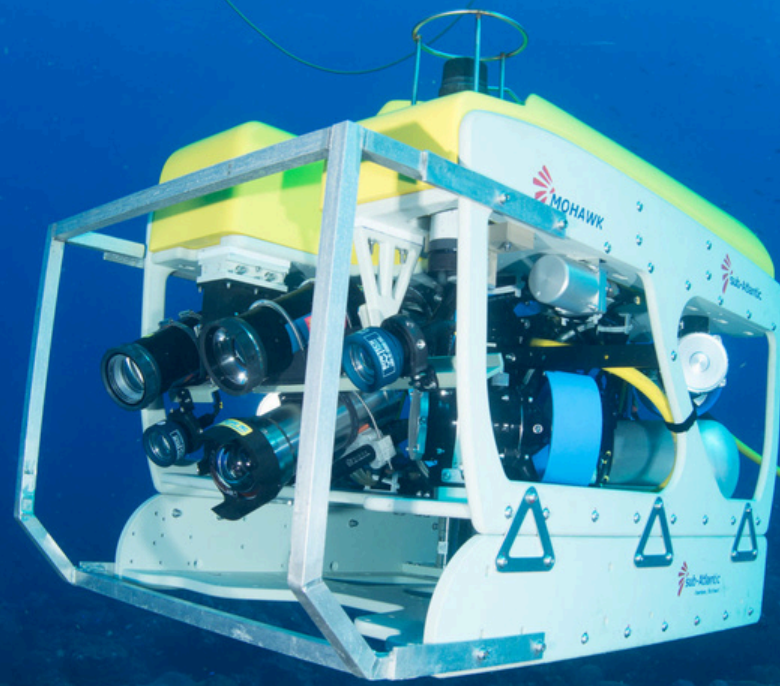

Assisting in the relocation of drilling rigs.

● Subsea Measurements

Gathering data for corrosion protection and ultrasonic testing.

● Internal Pipeline Inspection

Visualizing the interior of pipelines.

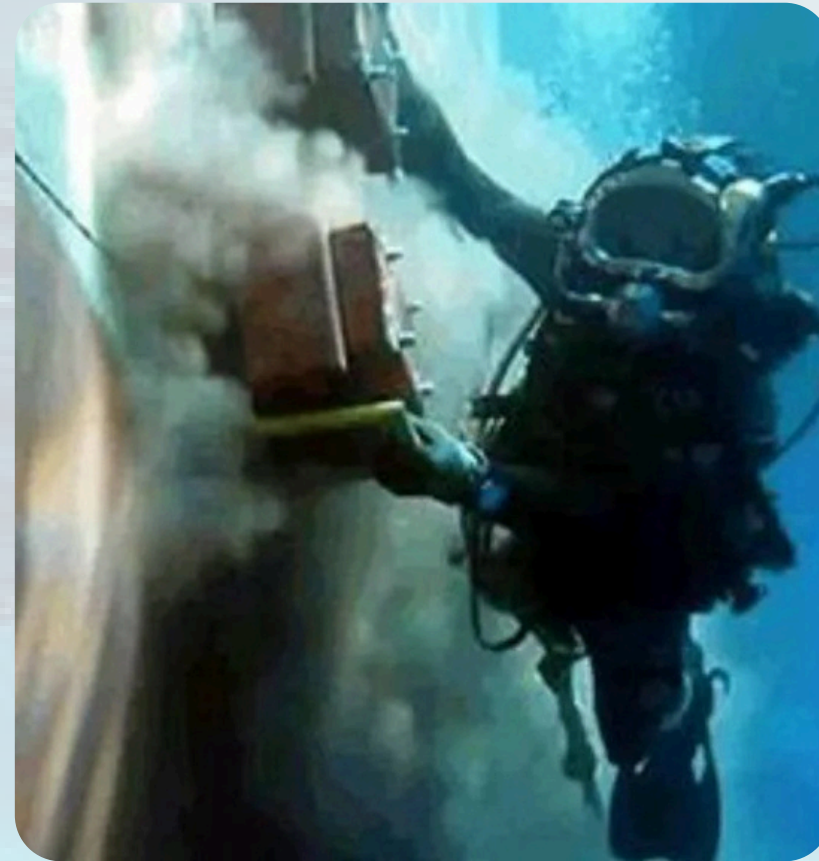

OUR PROJECTS..

Dsoq water station suction pipes 2014

- Submerge and fix pipes underwater**
- Installing protection filters on pipe openings**

Underwater inspection and cleaning of vessels

- Underwater inspection of vessels and measurement of metal thickness**
- Cleaning the hull of the boat**
- Cleaning the propeller, rudder and filters**

Water pumping station for greenhouses in Minya

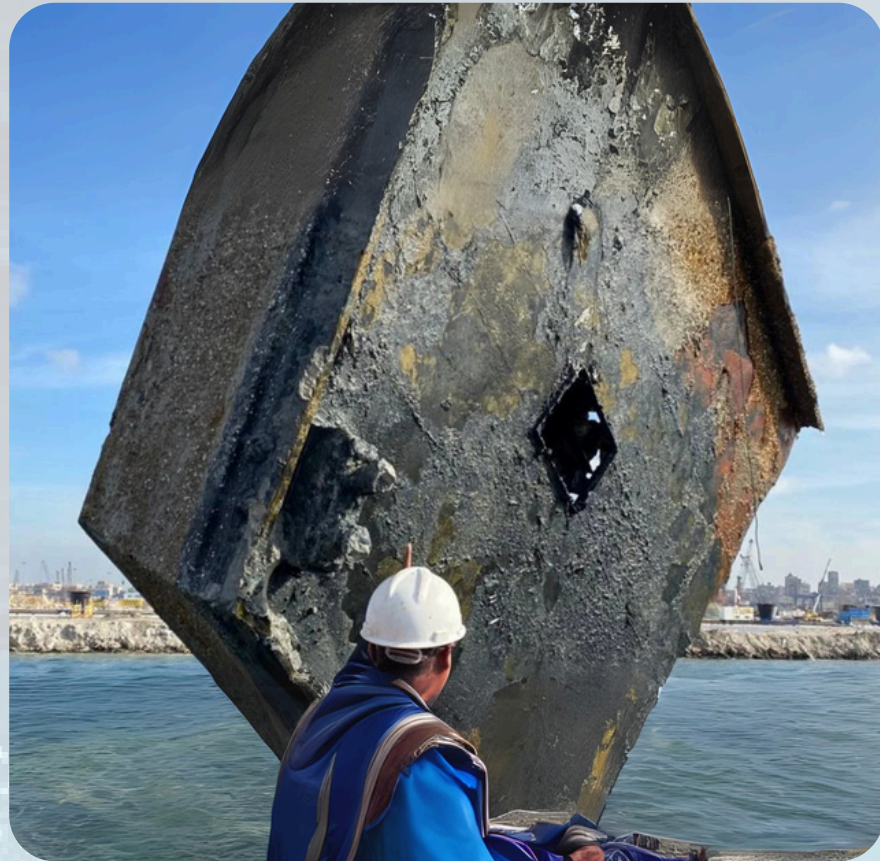

- Installing clamps on piles**
- Installation of metal chairs for pipes**
- Sinking the pipes and tying them to the metal chairs**
- Installing filters on pipe openings**
- underwater pile cutting**
- Placement of 10 ton blocks for the walkway**
- Installing the floating walkway over the pipes**
- _ Installing a weed protection net**

Qena water station suction pipes 150 meters long

- Pile driving**
- Clamps and cam installation**
- Pipe installation and fixing**
- Installing valves on pipes**
- Installing filters on pipes**
- Connecting pipes to the septic tank**
- Installing a belt between piles**
- Installation of the external walkway**

OUR PROJECTS..

Cleaning the navigation channel of Alexandria port
-seabed inspection
-Cutting up sunken ships and removing them

Installation of Assiut water station suction pipes
-Installation of clamps and iron beams
Pipe installation and connection
Installation of valves and filters
Installing a weed protection net
Underwater concrete crushing
Installing pipes on the well and pouring concrete into the water
Installation of the external walkway

Installation of water station pipes el saf
-Installation of clamps and iron beams
Pipe installation and connection
Installation of valves and filters
Installing a weed protection net
Underwater concrete crushing
Installing pipes on the well and pouring concrete into the water
Installation of the external walkway

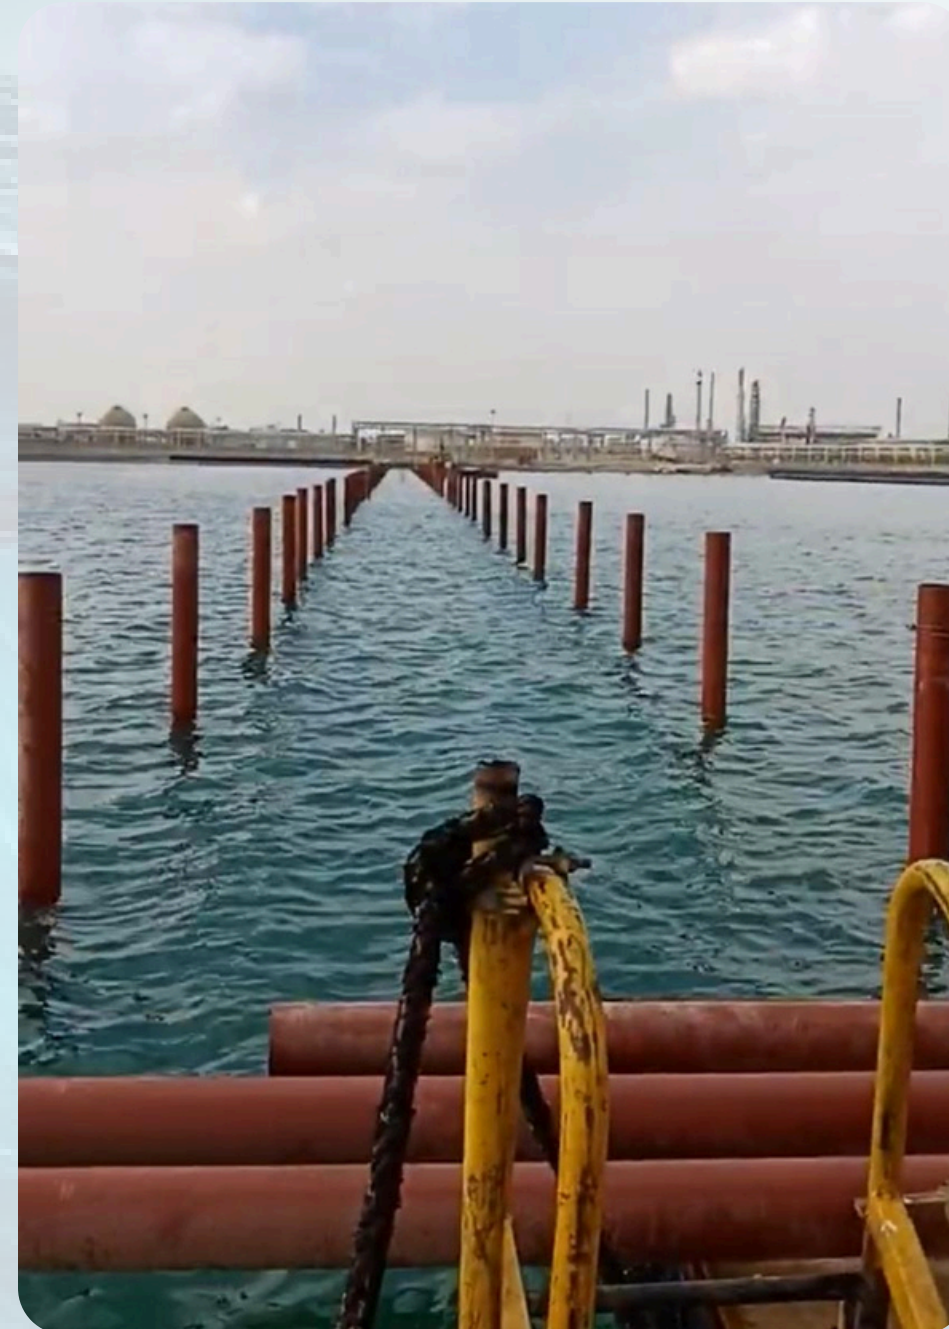

Cleaning the sedimentation basins of agricultural greenhouses in Fayoum
Installing weed protection nets
Cleaning sinks using air lift
Cleaning internal filters
Drilling and fixing the base of the submersible pump under water

OUR PROJECTS..

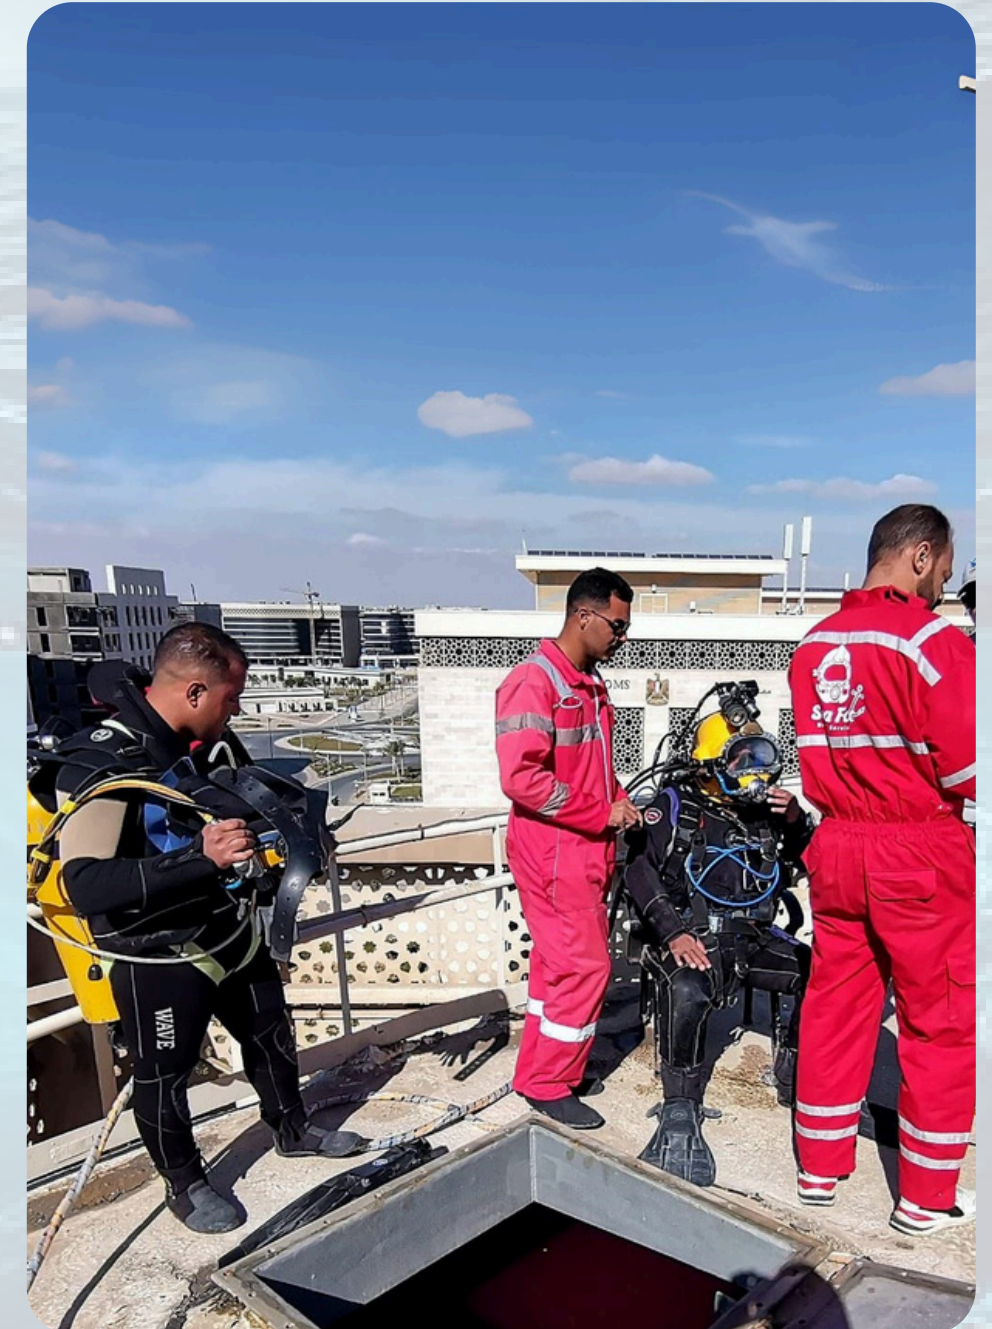

Seabed survey before Laying a cable for Telecom Egypt in Taba

- Samples of Tarab
- Work of probes
- Seabed Video recording

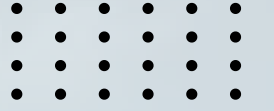

Pile hammer for discharge pipes of Nasr Petroleum Company

Inspection and maintenance of large water tanks

OUR CERTIFICATES

Certificate

Quality Management System

Sea fox

Store No. 609, Block 36, Mina El Basal, Alexandria, Egypt

ISO 9001:2015

SMSC (diving & marine services)

Better Future Co. confirms with the certificate details given above, that the organization has an appropriate management system complying with the relevant standard principles. This certificate is valid until the date of certification period expiry date only provided that the management system is found successful as a result of surveillance audits.

Certificate Number: **BF-SFX-12032024-09**

Initial Certificate Date : 12/03/2024

First Surveillance date : 12/03/2025

Certification Cycle Expiration Date : 11/03/2025
